

Produce Traceability Initiative Country of Origin Codes for Use With Data Synchronization

Use the following codes to identify a product’s country of origin when providing master data for items. The list contains 2 code values: 2-digit alpha code, and 3-digit numeric node. When using the PTI-provided Data Synchronization Template (Excel spreadsheet) to create your company’s specific data synchronization spreadsheet, it is recommended to utilize the 2-digit alpha code. When populating a Global Data Synchronization item message or to populate the trade item country of origin attribute for EDI transactions, the use of the 3-digit numeric code is required.
